SUSTAINABILITY

The EcoLogix®, DuraGlobe™, and Net Zero Carbon™ collections of products demonstrate our commitment to sustainability and ecological responsibility with awareness of our impact on the environment.

With the EcoLogix® Collection, products are constructed with **100% post-consumer recycled paper**, **90% recycled wire** and **50% post-consumer recycled covers**. Ecological tips are included within the pages to increase environmental consciousness.

DuraGlobe™ products are made with **Bamboo fiber paper**, an eco-friendly alternative to paper made from trees. Bamboo is the fastest growing plant on Earth, reaching maturity in three to five years, or less. When cut, the stem is left in the soil to sprout a new shoot so the growing process begins again. The Net Zero Carbon™ product line displays the Carbon Neutral seal, meaning **CO2 emissions were reduced to Net Zero** in accordance with the carbon neutral protocol to offset carbon emissions. Production and purchase of Net Zero Carbon™ products help reduce the ecological footprint and act against the effects of global warming.
